# SERVICES AND PRODUCTS FOR NURSERIES

## ● ABOUT US

---

Founded in 1990, **Agri Vivai** is now a benchmark in the nursery industry.

Over the years, the company has built a solid reputation based on reliability, technical expertise and constant attention to the quality of the products and services offered.

### **Where we are**

With a logistics area of over 15,000 square metres located in the heart of Pistoia, Agri Vivai operates from a strategic position that facilitates relationships with producers, customers and industry partners.

# ● OUR VISION

---

Agri Vivai believes in a model of agriculture and nursery production based on quality, sustainability and continuous innovation. Its goal is to support green industry businesses in their development by offering products and solutions that contribute to responsible and long-term growth.

In a constantly evolving market, Agri Vivai positions itself as a reliable and proactive partner, able to anticipate sector needs and support change with expertise and vision.

# ● OUR VALUES

---

- Sustainability
- Quality and reliability
- Innovation and research
- Expertise and service
- Collaboration and trust
- Territory and roots

Agri Vivai builds its work on sustainability, quality and innovation. The use of recycled and recyclable materials, combined with low environmental impact solutions, goes hand in hand with constant supply chain control and continuous technical research.

The expertise of the team, ongoing dialogue with customers and strong ties to the Pistoia area guide every decision, striking a balance between tradition, trust and future vision.

# ● HOW WE WORK

---

- Partnerships
- International markets
- Research
- Trade fairs
- Logistics
- Import

Agri Vivai works alongside professionals and companies in the nursery sector, building relationships based on trust and expertise, with the aim of offering a complete consultancy service that starts with listening and continues through to after-sales support.

A skilled and responsive team is able to turn every supply into a long-term collaboration.

## LOGISTICS

Agri Vivai's logistics organisation is a well-established strength. Efficient warehouse and shipment management ensures fast and reliable delivery times, both nationally and internationally.

## TRADE FAIRS

The company maintains an active and consistent presence at major industry trade fairs in Italy and abroad, taking part as both an exhibitor and a visitor.

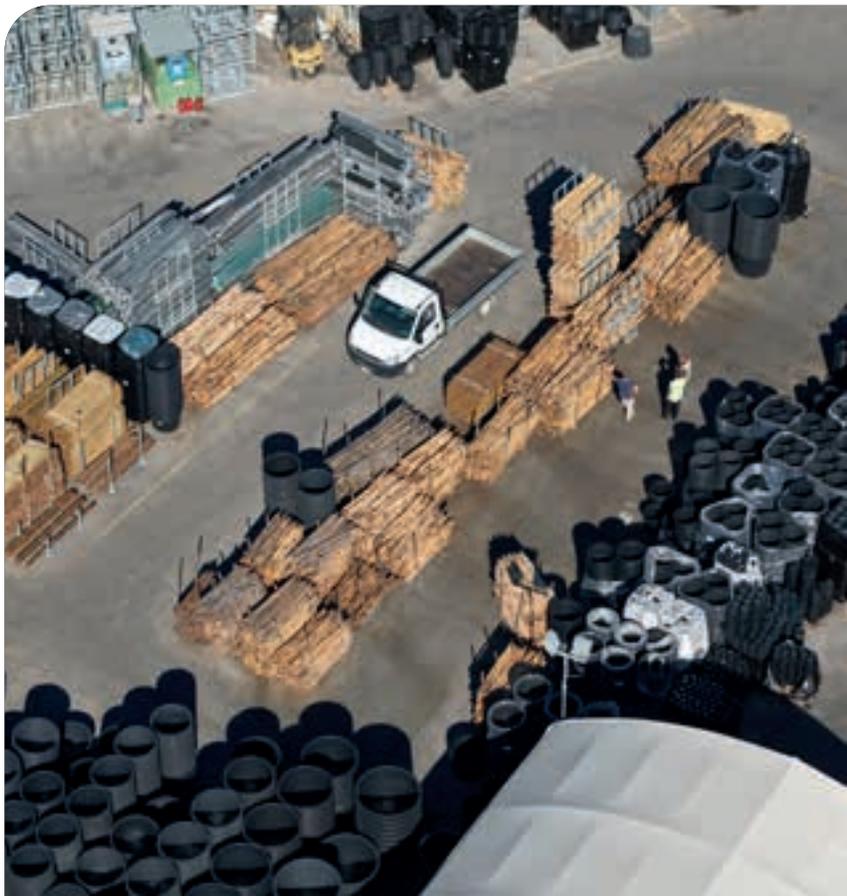

## TEAM

The experienced team is always available to share its expertise and present the latest market innovations, providing a complete service fully tailored to the specific needs of each customer.

# OUR PRODUCTS

---

Agri Vivai's range includes a complete assortment of products and equipment for professional nursery operations. Each category is the result of careful selection of the best brands and materials, ensuring consistent quality, functionality and environmental responsibility. From pots to substrates, from plant supports to protective equipment, every solution is designed to enhance daily work with efficiency and reliability, addressing the real needs of industry professionals.

Agri Vivai has also developed a range of exclusive professional products dedicated to nursery growers, including:

|  
**01 – Agri Pot**

**02 – Demetra pot**

**03 – Nursery pot**

**04 – Containers with handles**

**05 – Professional substrates**

|

# ● POTS, CONTAINERS AND PROPAGATION

---

Starting with durable and sustainable pots made from 100% recycled and recyclable plastic, Agri Vivai offers a complete and versatile range of containers selected for every stage of the production cycle.

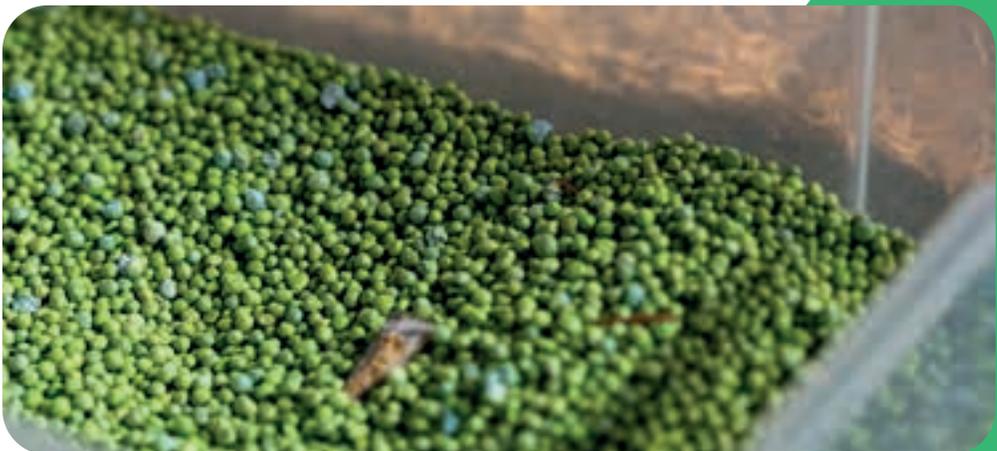

# ● SUBSTRATES, ORGANIC MULCHES AND FERTILISERS

---

Custom production and careful selection of products to nourish and protect plants: professional substrates, natural mulches, fertilisers and biostimulants for healthy and sustainable growth.

# ● PLANT PROTECTION PRODUCTS, INTEGRATED PEST MANAGEMENT, PESTICIDES

---

Effective and environmentally responsible solutions for crop protection, with products designed for prevention and the natural strengthening of plants, avoiding as much as possible the use of pesticides.

# ● CUTTING TOOLS AND HARDWARE

---

Professional tools and accessories for daily nursery work: reliable, ergonomic and designed to ensure precision and long-lasting performance.

# ● PACKING, PLANT SUPPORTS, GRAFTING

---

Materials and accessories for packaging, tying and grafting, designed to protect and support plants during growth, transport and sale.

# ● PROTECTED CULTIVATION, GEOTEXTILES, TROLLEYS

---

Practical solutions for handling and managing work areas and new cultivation fields. Technical products and efficient systems to optimise time and space.

# ● SPRAYING, IRRIGATION

---

Systems and accessories for precise and efficient irrigation and spraying, designed to ensure uniform distribution, water saving and long operational life.

# AGRI-POT

THE FIRST POT DESIGNED BY AGRI VIVAI

> **ANTI-SPIRALLING**

Prevents root spiralling, promotes a radial root system.

> **EXCELLENT DRAINAGE**

Raised holes on the bottom prevent water stagnation on any surface.

> **EASY-TO-USE**

The care over the details ensures easy denesting and bagging.

## AGRI-POT

## Container grid

The container grid is conceived to guarantee time and cost savings because it is designed to support the plants and stop them being blown over by the wind.

The structure is ideal both for drip irrigation and sprinkler system. The panel is welded with a special Zinc-Aluminium wire, offering superior resistance to corrosion, lasting 2-3 times longer than heavy galvanized wire. The aluminium in the alloy encourages the formation of aluminium oxides on the surface of the wire, with a characteristic burnished colour, constituting yet another barrier against rust.

# Professional substrates production

---

Agri Vivai is a manufacturer of professional substrates for all types of crops.

Registered in the Italian Register of Fertiliser Manufacturers under number 01774/16, Agri Vivai selects only the highest-quality raw materials for the production of horticultural substrates. The type and quantity of each component can be customised to meet specific requirements.

A dedicated technical department provides expert support in selecting the most suitable blend, oversees production and monitors quality standards, while also offering on-site after-sales assistance to evaluate results together with the customers. Substrates can be supplied in bulk or Big Bags.

## Wood chips for mulching

Wood chips obtained from certified industrial processing by-products (wood shavings, beech flakes, Chestmulch) or from virgin wood (conifer, ash and beech chips), specifically processed for mulching. Provides excellent results in weed control both in pots and open field cultivation. It reduces evaporation, keeping the substrate cooler in summer and less cold in winter. Allows proper percolation of surface-applied fertilisers and irrigation. Some materials are subject to seasonal availability.

### Conifer wood micro chips

#	Size	Package
CIPPCONM	2/10	Big Bag 1000lt with drain valve

## Miscanthus for mulching

Chopped undusted Miscanthus, in sterile variety specifically for biomass and mulching.

The crop is not treated with any fertilisers or plant protection products, making it 100% natural

Excellent control of weeds in potted plants and open fields. Limits transpiration, keeping the substrate cooler in summer, and less cold in the winter.

Allows percolation of surface fertilisers and irrigation.

Standard 10/15

Standard 20/24

#	 E		 x 
MISCA15STA1015	10/15	15kg	60
MISCA15STA2024	20/24	15kg	60

## Rice husk

Sterilised and ideal for lightening and aerating substrates. Also used as mulch.

#	Format	Pieces per pallet
LOLLA	200 lt	24

## Cereal straw in pellets

Mulching pellets that are 100% ecological and biodegradable. Ideal for manual application, they triple their volume when hydrated, spreading evenly over the entire surface to be mulched. The straw is obtained from cereals grown without the use of chemical fertilisers, pesticide treatments or irrigation, and processed exclusively through mechanical methods using a high-temperature pelletisation process.

#	Format	Pieces per pallet
PELPA20S	20 kg	45

## Coco coir mulching disc

100% coco coir; Thickness: 800 gr/m<sup>2</sup>

## Jute mulching panel for trays

Composition: 100% jute; Weight: 600 g/m<sup>2</sup>; Suitable for all types of cells with round or cross cut. Available in customised sizes and shapes to fit any type of container, tray or plant variety.

#
FELJUV

## Super nocciolo

High quality ternary organic-mineral fertiliser, particularly suited to fertilising open field nurseries. Thanks to the nitrogen content in the organic form (2%) and ammonium form (10.5%), it ensures immediate and progressive nutrition over time.

#		NPK+ %		
SUPNOC25	Granules	15-5-5-5+MgO	25 kg	60

## Humi Olivo

Organic-mineral NPK fertiliser with a high nitrogen content, recommended for the fertilisation of tree and vegetable crops. The granular formulation ensures easy and uniform application using commonly available spreading equipment.

#	NPK+ %	
HUMIOLIVO	14-7-25	25 kg

## Humi Vigna

Organic-mineral NPK fertiliser with a high potassium content, particularly recommended for viticulture and, more generally, for most tree crops. It combines an optimal phosphorus-potassium supply with a fractionated, non-leachable nitrogen content.

#	NPK+ %	
HUMIVIGNA25	5-7-14	25 kg

## Humi 7-7-7

Balanced organic-mineral NPK fertiliser with high versatility of use. The nitrogen supply is made available through a constant and gradual release, thanks to its fractionation into ammoniacal and organic components.

#	NPK+ %	
HUMI77725	7-7-2007	25 kg

## Bio n Tek 58 b.t.c.

Ternary organic-mineral fertiliser ideal for the fertilisation of all crops requiring an NPK 12:4 ratio. With zeolite.

#		NPK+ %		x
BNTEK5825	Granules	4-7-14 (2+17)	25 kg	60

## Organcote 6s

NPK ternary organic-mineral fertiliser. With Sequestrene. The huge quantity of chelated iron enhances the green color of plants and improves their growth. It is dust free and has a low impact on the increase of salinity given from fertilization.

#		NPK+ %		x
ORGC6S	Granules	16-5-2005	25 kg	48

## Fertifield fertilisers

### Fertifield 18-7-5

NPK ternary organic-mineral fertiliser.

LUPI5	Flakes	5 kg	260

# Compo Expert

## Flexicote®

Flexicote is a line of mineral fertilisers partially coated with POLIGEN W3 membrane. The controlled release is combined with the immediate action of all the nutrients of the uncoated granules.

#		NPK+ %			
FLEXI12	Granules	14-8-13+2MgO +me	80% 12 months	25 kg	42
FLEXI09	Granules	15-8-13+2MgO +me	80% 9 months	25 kg	42

## Agrosil® LR

Phosphate fertiliser that improves the chemical and physical structure of all soil types, promoting root development and the absorption of water and nutrients.

#			
AGROS25	Granules	25 kg	40

## Triabon®

Mineral slow-release fertiliser for top-dressing applications, with 70% of the nitrogen in the form of CROTODUR®, ensuring crop nutrition for 12–16 weeks.

#		NPK+ %		
TRIA25	Granules	16-08-12+4MgO+micro	3/4 months	25 kg

## Basacote® Plus

Basacote® Plus is a line of complex mineral NPK fertilisers with controlled release, ideal for nurseries, floriculture and horticulture.

The granules are coated with POLIGEN W3 technology, a high quality, highly reliable, legally authorised polymer-based coating material.

Nutrient release in accordance with crop needs. The controlled release of the nutrients occurs through the granule coating material, in proportion to the needs of the crops. As the temperature increases, so too does the plant's need for nutrients, and thus the nutrient release by Basacote Plus® occurs more quickly. To the contrary, in lower temperatures, the plant's needs decrease and the Basacote Plus® activity slows. The regularity and homogeneity of the coverage ensures a highly efficient action on all plants.

#		NPK+ %			
BASAP325	Granules	16-8-12+2MgO	3 months	25 kg	42
BASAP625	Granules	16-8-12+2MgO	6 months	25 kg	42

BASAP1225	Granules	15-8-12+2MgO	12 months	25 kg	42

## Basacote® High K

Fully coated complex NPK fertiliser with controlled release, with an emphasis on potassium and an optimal set of trace elements. Suitable for substrate mixes, as well as for top-dressing and planting hole applications.

#		NPK+ %			
BASAP13518925	Granules	13-05-18(+2)	9 Months	25 kg	42

# Prontocote®

The line of Prontocote® fertilisers is highly specialised for the top dressing fertilisation of ornamental potted plants.

Prontocote differs from other top dressing fertilisers because:

- The slow release part is completely wrapped in a resin membrane of the highest quality (Multicotech - MCT technology). The release is constant and gradual.
- Even the non-wrapped part is of the highest quality: the potassium is from nitrate (the purest and most assimilable form), and the phosphorus and magnesium are very highly soluble and immediately assimilable by the plant.
- It is the fertiliser with the best chelated iron. Prontocote **1** **3** **10** contain 3% of Sequestrene® Life and 3% Ferrene.
- Excellent value for money.
- It is also available in the version with anti-tip glue (in Prontocote **1** **3** **7** ). Using this glue, the fertiliser doesn't fall out of the pot if accidentally tipped over or in case of heavy rain.
- The glue doesn't clog the fertiliser spreader doser and is completely natural.

**Prontocote® 4s**

7

Slow release mineral fertiliser with Sequestrene® and anti-tip glue. High immediate release, very greening. Ideal for plants with strong and medium vegetative growth prone to yellowing or already yellow.

#		NPK+ %			
PRSEFECO425	Granules	19-10-11+3	4 months	25 kg	60

**Prontocote® 4s slow**

10

Slow release mineral fertiliser with Sequestrene® Very high immediate release, very greening. Ideal for plants requiring a strong push, with drip irrigation or mulched.

#		NPK+ %

# Germina range

## Red

### Specific product for managing crop stress.

Humic extract specifically formulated for foliar application. It increases plant resistance to high temperatures and drought. It reduces damage caused by crop protection products and phytotoxic substances. It improves overall plant health and enhances the effectiveness of associated foliar fertilisers.

#	⊗	👁	📍	📦
RED	Mix of humic and fulvic acids	Liquid	Foliar	1-5-20 kg

## Red Radicale

### Specific product for promoting root development.

Promotes the formation of new roots Promotes the balanced absorption of nutrients Counteracts problems caused by root asphyxia Promotes the reproduction and activity of the useful organisms in the soil and rhizosphere Contains humic acids with medium-high molecular weight, and is therefore ideal for use in fertigation.

#	⊗	👁	📍	📦
REDR	Mix of humic and fulvic acids	Liquid	Fertigation	1-5-20 kg

## Blu

### Product that stimulates the uptake of nutrients and promotes nitrogen metabolism.

Promotes the formation of new roots and root activity Stimulates the uptake of nutrients and promotes nitrogen metabolism Promotes plant growth and development Promotes lesion repair Does not increase the salinity of the soil and substrates.

#	👁	NPK+ %	📍	📦
BLU	Liquid	7% Organic nitrogen	Foliar, Fertigation	1-5-20 kg

## Maior Plus

### Specific product for promoting plant photosynthesis

Increases the efficacy of photosynthesis Promotes growth  
Promotes tillering Promotes the accumulation of stored reserves  
Promotes recovery from abiotic stress.

#		NPK+ %		
MAIORP	Liquid	6-5	Foliar	1-5-20 kg

## Maior Nova

### specific product for promoting energy production in plants.

Promotes the production of chlorophyll. Increases the efficacy of photosynthesis. Promotes the accumulation of stored reserves.  
Promotes an increase in flower buds in fruit crops. Promotes recovery from abiotic stress (e.g. heat stress, excess salinity, hail stress).

#		NPK+ %		
MAIORN	Liquid	1% Organic nitrogen	Foliar	1-5-20 kg

## Relife

### specific product for increasing plant productivity.

Promotes the formation of secondary roots and improved uptake of nutrients Promotes the formation of flower buds Promotes fruit set and reduces fruit drop Helps overcome stress Promotes the growth and development of plants in nurseries.

#		NPK+ %		
RELF	Liquid	1% Organic nitrogen	Foliar	1-5-20 kg

## Maior O-42-50

### product with highly effective phosphorus.

Highly stable and available phosphorus. The phosphorus is easily assimilated by the roots. Promotes balanced plant growth. Promotes flower bud formation and flower set. Promotes increased fruit size.

#		NPK+ %		
MAIOR42	Liquid	0-42-50	Fertigation	6-25 kg

## Additivo Fertirrigazione

### Product to correct and acidify water used in fertigation and foliar applications.

Improves the effectiveness of water soluble fertilisers by 15-20%  
Prevents increases in salinity and pH Removes limescale from leaves  
Optimises the characteristics of the water used for foliar treatments  
Prevents the build-up of limescale in fertigation systems.

#			
ADDFO	Liquid	Foliar, fertigation	1-5-20 kg

## Better

### specific product for promoting cell reproduction.

Promotes flower set. Promotes flower bud induction. Promotes early flowering. Promotes the rooting of cuttings.

#				
BETTER	Yeast and seaweed extracts	Liquid	Foliar	1-5 kg

## Systema

### phosphorus and potassium-based foliar fertiliser with water acidifying properties.

Optimises the water pH.  
Low doses and high efficacy. Promotes productivity.  
Contains excessive vigour.

#		NPK+ %		
SYSTE	Liquid	0-14-5	Foliar	1-5-20 kg

## Minus Ferro

**specific product for preventing and curing iron deficiencies.**

Very rapidly absorbed by the leaves. Evenly greens. Not phytotoxic. Not photolabile. Does not contain chelates or synthetic chemical complexes.

#				
MINUSF	5% Iron	Liquid	Foliar	1-5-20 kg

## Minus Calcio

**specific product for preventing and curing calcium deficiencies.**

A product designed for the rapid uptake of calcium. Very rapidly absorbed by leaves and fruits. Increases the hardness and shelf life of fruit and vegetable products. Does not contain chelates or synthetic chemical complexes. Not phytotoxic.

#				
MINUSC	12% Calcium	Liquid	Foliar, Fertigation	5-20 kg

## Minus Rame

**specific product for copper deficiencies.**

A product designed for the rapid uptake and translocation of copper. Does not contain chelates or synthetic chemical complexes. Compensates for important copper deficiencies that cannot be visually diagnosed. Nourishes the plant, delivering copper where other products cannot. Suitable for any type of agriculture (conventional, organic, biodynamic, etc.).

#				
MINUSR	5% Copper	Liquid	Foliar, Fertigation	1-5-20 kg

## Minus Zinco

### Specific product for preventing and curing zinc deficiencies.

Prevents and cures zinc deficiencies. Rapidly absorbed by the leaves. Highly effective in fertigation. Does not contain chelates or synthetic chemical complexes. Suitable for any type of agriculture (conventional, organic, biodynamic, etc.).

#				
MINUSZ	5% Zinc	Liquid	Foliar	1-5-20 kg

## Ice Time

### specific product for preventing frost damage.

Reduces the risk of frost damage. Created to prevent stress caused by severe drops in temperature. Applied in fruit farming and horticulture to promote greater productivity. Reduces the risk of rust formation in fruit.

#				
ICET5	Blend of plant extracts	Liquid	Foliar	5-20 kg

# Ilsa range

## Ilsavegetus

### flowering and set promoter.

Promotes vegetative development and synchronous flowering. Stimulates anthesis and meristemic activity even during periods of stress. Promotes fruit set and reduces fruit drop.

#				
ILSAVEG	Enzymatic hydrolysate of Fabaceae	Liquid	Foliar	1-5-20 kg

## Ilsarodder

**rooting and growth stimulant of plant biomass.**

Stimulates root growth and development. Promotes improved flowering and sets.

Enhances the action of nutrients and water.

## Ilsamin N90

**biostimulant product with specific action on plant.**

Helps to overcome periods of stress and balances nutritional activity.

Increases production and overall quality. Improves plant health. Allows plant tissue repair.

#	👁	NPK+ %	📍	📦
ILSAMN90	Liquid	8,9% Organic nitrogen	Foliar	1-5-20-250 kg

## Ilsamin Calcio

**calcium-based foliar fertilizer.**

Prevents and cures CALCIUM deficiencies. Prevents specific disorders due to calcium deficiencies. Improves the quality of production.

#	👁	NPK+ %	📍	📦
ILSAMC	Liquid	5% Organic nitrogen +CaO 5(8)	Foliar	1-5-20 kg

## Ilsamin MMZ

**Gelamin®-based foliar fertiliser with complexed magnesium, manganese and zinc.**

Cures and prevents specific deficiencies of citrus and other fruit plants Promotes photosynthesis and intensifies the colour of the leaves; Stimulates fruit swelling by increasing the quantity and counteracting the drop.

#	👁	NPK+ %	📍	📦
ILSAMMZ	Liquid	4% organic nitrogen +MgO 4(2)	Foliar	1-5-20 kg

## Ilsakolorado

**promotes improved development of the natural pigments giving fruit its final colour.**

Evens out fruit colouring. Reduces stress phenomena during ripening. Accelerates and evens out the final quality of the fruits.

#		NPK+ %		
ILSAKO	Liquid	4% Organic nitrogen	Foliar	1-5-20 kg

## Ilsadrip Forte 9%

**strong 9% gelamin®-based nitrogenous organic irrigated fertiliser with high nitrogen content and laevorotatory lamino acids.**

Contains protein nitrogen from enzymatic hydrolysis, immediately available for the plant without losses due to leaching. Increases root mass and active roots, promoting exploration of the soil. It is particularly suited in "difficult" environmental conditions (temperature fluctuations, difficult nutrient uptake due to salinity, water crises or insufficient light). Promotes greater and balanced vegetative development.

#		NPK+ %		
ILSAFO	Liquid	9% Organic nitrogen	Fertigation	20-250-1200 kg

## Splinter New

**natural conformulant with strong synergising and humectifying properties.**

Makes each foliar application more effective and is to be mixed with other products. Performs a specific disintegrating action on the sugary substances produced by psylla and aphids and an effective cleansing action on honeydew.

#		NPK+ %		
SPLI	Liquid	7% Organic nitrogen	Foliar	1-5-20-250-1200 kg

## Biostimulants and fertilisers

### Bio Ortica extract

Natural product obtained from nettle fermentation, mainly used for the control of harmful insects and mites.

#	
BIORT05	0,5 kg
BIORT1	1 kg
BIORT5	5 kg

### Bio Storm plant strengthener

#	
BIOSTOL10	10 lt

### Blackjak Bio

Product based on humic extracts with acidic pH.

#	
BLKJKL1	1 lt
BLKJKL5	5 lt

### Serbios Chitosano

Natural elicitor based on chitosan.

#	
CHITOSL1	1 lt

### Emoplas Protein

Fluid organo-mineral fertiliser 3-4-6 hydrolysed plasma.

#		
EMOPS	Liquid	1-5 lt

### Ermes

Natural resistance inducer against the main adversities.

#		
ERMES1	Liquid	1-5 lt

### Folur

#	
FOLUL1	1 lt

### K-Energy

Borlanda.

#		
KENE30	Liquid	30 kg

### Kelpak

Natural bioregulator based on Ecklonia maxima.

#		
KELPL	Liquid	1-5-10 lt

### Madison

Plant growth bioinducer based on amino acids.

#		
MEDISON	Liquid	1 lt

### Maxi Grow Excel Italia

Product of organic origin obtained through fermentation processes.

#		
MAXGEXL1	Liquid	1 lt

### Naturalbio

Liquid organic fertiliser, resistance inducer.

#		
NATURALB	Liquid	5-30 lt

### Naturalcupro

Natural resistance inducer against the main adversities

#		
NATURCU	Liquid	1-5 lt

### Naturalmicro

Micronutrients in solution against the main micronutrient deficiencies.

#		
NATURMI	Liquid	5-30 lt

### Pentac-5ala

Fertiliser 3-8-4 + micronutrients + 5-aminolevulinic acid.

#		
PENT5A1	Liquid	1 lt

### Root Most

Natural growth promoter derived from algae for root application.

#		
ROOTM5	Liquid	5 lt

### Rootex Italia

Product of organic origin with a high concentration of active ingredients.

#		
ROOTX1	Liquid	1-10 kg

### Umico

Liquid humic acids.

#		
UMIC1	Liquid	1 kg

### Utrisha N (Blue N)

Biostimulant based on *M. symbioticum* SB23 for efficient atmospheric nitrogen uptake. Able to stimulate photosynthetic activity.

#		
BLUEN1	Granules	1 kg

## Meso and macro elements

### Bio 9 Rame Plus

Copper (CU+MN+ZN)

#		
BIO9RP	Powder	1 - 5 kg

### Borosprint

Contains 11% boron.

#		
BORSP1	Liquid	1 lt

### Class FE G-Form

Organic fertiliser containing N and Fe, for the prevention of chlorosis.

#	
CLASSG	1 kg

### Ferticus 380

Highly concentrated foliar fertiliser based on copper oxychloride. Blue-coloured.

#	
FERTCS380L1	1 lt
FERTCS380L5	5 lt

### Ferticus 40M

Wettable powder foliar fertiliser that prevents Cu and Mn deficiencies.

#	
FERTCS40G10	10 kg

### Gheox-ZN

Mix of macro and micro elements.

#		
GHEO1	Liquid	1 kg

### Iron 4

Mix of microelements.

#		
IRON4	Liquid	6,5 kg

### Kemiron FE 8 DTPA

Iron 8% DTPA.

#		
KEMIRL	Liquid	1 - 5 lt

### Microfol combi

Chelated micronutrient and magnesium blend

#		
MICRC1	Powder	1-10 kg

### Molybdenum 10 LG

Sodium molybdate 10%

#		
MOLB10LG1	Liquid	1 lt

### Multibor PS21

Fertiliser with 21% boron

#		
MULTB1	Liquid	1-10 lt

### Mycrophyt Plus

Mix of micro elements,

#		
MICRPH	Liquid	1 - 30 kg

### Rame liquido 100 Complex

Copper

#		
CopperL1	Liquid	1 lt

### Secur 30

Copper oxychloride

#		
SECUR301	Liquid	1 lt

### Secur Zolfo

Fertiliser with 51% sulphur.

#		
SECURZ1	Liquid	1 kg

### Sequestrene Life 138 FE WG

Chelated iron 5.5% EDDHA for the prevention of iron deficiencies in crops with NK 3-15.

#		
SEQUAL	Powder	1-10-25 kg

### Sequestrene NK 138 FE

Chelated iron 6.2% EDDHA for the prevention of iron deficiencies in crops.

#		
SEQU	Powder	1-10-25 kg

### Copper sulphate granitello

Copper sulphate 25%

#		
SORAG	Granules	5-10 kg

### Sprintene

Growth stimulant.

#		
SPRIL1	Liquid	1 lt

### Tradecorp MG

Magnesium EDTA chelate 10%

#		
TRADMG	Powder	1-5 kg

### Tradecorp MN

Manganese EDTA chelate 13%

#		
TRADMN1	Powder	1 kg

### Tradecorp ZN

Zinc EDTA chelate 14%

#		
TRADZN1	Powder	1 kg

### Tradeferro 2,5% GR

Iron 2.5% micropellet – ideal for top-dressing re-fertilisation.

#		
TRADEFE5	Granules	5 kg

### Vondofer

Chelated iron 6% EDDHA

#		
VOND5	Powder	5 kg

## Complementary products

### Barrier Si-Ca

High calcium and silicon content. Dwarfing effect in foliar applications in nurseries.

#		
BARRIL5	Liquid	5 - 20 lt

### Black Zeo

Granular zeolite.

#		
ZEOL1320	Powder	5 - 25 kg

### Blattab

Leaf drop promoter.

#		
BLAT	Liquid	1-15 lt

### Clear

Sanitising agent for irrigation water reservoirs.

#		
CLEAR10	Liquid	10 lt

### Control DPM

Fertiliser with acidifying and surfactant action.

#		
CNTRDMPL1	Liquid	1 lt

### Fertifire

Acetic acid, natural desiccant.

#		
FERTF	Liquid	1-5-20 kg

### Fitotherm

Antitranspirant, protective in case of frost.

#		
FITOTL	Liquid	5-20 lt

### Green Drop

Agricultural wetting agent.

#		
GREDR1	Liquid	1 kg

### HDP80

Tank cleaner for containers holding plant protection products.

#		
HDP801	Liquid	1 lt

### Inex-A

Non-ionic adjuvant, suitable for use with plant protection treatments.

#		
INEXL	Liquid	1-5 lt

### Invelop® - rock dust

Rock powder. Natural repellent.

#		
INVELOPWP25	Powder	25 kg

### Kamasol Aqua

Water absorption optimiser and soil wetting agent.

#		
KAMS5	Liquid	5 lt

### Lumik

Adjuvant and plant protection product enhancer.

#		
LUMIK1	Liquid	1 lt

### Omniclear Plus

Blend composed of plant extracts, natural salt and acetic acid. For the control of algae, moss and small spontaneous weeds.

#		
OMNICLPLU5	Liquid	5-10-20 Lt

### Oxyclean

Oxidising and sanitising agent for irrigation water reservoirs.

#		
OXYCL20	Liquid	20 lt

### Oxyplus 35

Hydrogen peroxide 35% for agricultural use.

#		
OXYP25	Liquid	10-25-50 kg

### Phomag

Crop metabolism promoter.  
Herbicide enhancer.

#		
PHOMAL5	Liquid	5 lt

### Purify Oils

Neutraliser with immediate action on emissions and fumes.

#		
PURIFYOILS1	Liquid	1 kg
PURIFYOILS5	Liquid	5 kg

### Top Ten

Ungulate repellent.

#		
TOPTNL1	Liquid	1 lt

### V-Plaask

Resistance inducer. Product containing salicylic acid derivatives.

#		
VPLAL1	Liquid	1 lt

### Vapor Gard

Antitranspirant.

#		
VAPOGL	Liquid	1-4 lt

## Specific products for correction

### Acetic acid 80%

Acidifying.

#			
ACIDAC	CH3COOH	Liquid	25 kg - GIR - bulk for tanks

### Citric acid

Organic acid for pH correction through fertigation.

#			
ACIDCI	C6H8O7	Granules	1-25 kg

### Phosphoric acid 75%

Acid for pH correction through fertigation.

#			
ACIDFO	H3PO4	Liquid	25 kg - GIR - bulk for tanks

### Nitric acid 60% - 64,5%

Acid for pH correction through fertigation.

#			
ACIDN66	HNO3	Liquid	25 kg - GIR - bulk for tanks

### Sulphuric acid 94%

Acid for pH correction through fertigation.

#			
ACIDS94	H2SO3	Liquid	25 kg - GIR - bulk for tanks

### Biosulf 50%

Acid soil amendment for alkaline soils.

#			
BIOSU25	SO3	Pellet	25 kg

**Hydrated lime**

Calcareous amendment for acidic soils and substrates, and neutralising agent for the preparation of Bordeaux mixture.

#			
CALCI	CaOH	Powder	6-25 kg

**Calcium carbonate 98% - 99%**

Calcareous amendment for acidic soils and substrates, and neutralising agent for the preparation of Bordeaux mixture.

#			
CARBC25	CaCO <sub>3</sub>	Powder	25 kg

**Potassium chloride**

#		NPK+ %	
CLORP25	KCl		25 kg
CLORPTEC	KCl	97%	25 kg

**Dolomite**

Calcareous amendment containing calcium and magnesium.

#			
DOLP25	CaMg(CO <sub>3</sub> ) <sub>2</sub>	Powder	25 kg

**Physiolith**

Granular calcareous amendment for acidic soils and substrates, containing Lithothamnium calcareum.

#			
PHYS25	CaO 36% MgO 2.5%	Granules	25-600 kg

**Aluminum sulphate 17%**

Hydrangea bluing agent.

#			
ALLUS	Al <sub>2</sub> (SO <sub>4</sub> ) <sub>3</sub>	Powder	1-5-25 kg

## COMPLEMENTARY AND CORRECTION PRODUCTS

### Calcium sulphate

Hydrangea reddening agent.

#			
SOLFCA	CaSO4	Powder	1-5-25 kg

### Iron sulphate 97% - 98%

Ferrous acidifying amendment for alkaline soils.

#			
SOLFE	FeSO4	Powder	1-25 kg

### Lenticular sulphur

Acid amendment for alkaline substrates.

#			
ZOLFL	S	Granules	25 kg

### Ventilated sulphur

Acid amendment for alkaline substrates.

#			
ZOLF	S	Powder	1-5-10-25 kg

# Soil, water and organic matter testing service

---

Our technicians collaborate with a third-party company to perform all types of testing in order to identify the characteristics of the water and soil.

Based on the results, they provide technical recommendations in order to develop the most efficient soil correction and/or fertilisation plan, and to solve any problems affecting the crop.

- WATER ANALYSIS
- SOIL ANALYSIS
- BACTERIOLOGICAL ANALYSIS
- ORGANIC MATTER ANALYSIS
- POTABILITY ANALYSIS
- NUTRITIONAL ANALYSIS
- SUBSTRATE ANALYSIS

# Bottos professional seeds

## Royal blue

Blend with exceptional tolerance to summer dryness and disease, consistent and dense appearance. Suitable for any type of context, whether purely for performance or strictly aesthetic, ornamental, technical, recreational, sports use. Suitable for any type of context, whether purely for performance or strictly aesthetic, ornamental, technical, recreational, sports use.

Composition: 90% Festuca arundinacea, 10% Poa pratensis.  
Dark colour – fine leaf texture.

#	☞ x m <sup>2</sup>	📦
MISCBOTTROYBLU	45/50 gr	1-10 kg

## Royal sport

Blend with high settlement rate, excellent disease tolerance, high trampling resistance. Used to develop ornamental and highly prestigious sports fields. Used to develop ornamental and highly prestigious sports fields.

Composition: 65% Lolium perenne, 35% Poa pratensis.  
Dark colour – fine leaf texture.

#	☞ x m <sup>2</sup>	📦
MISCBOTTROYSPORT	30/35 gr	1 kg

## Royal golf

Blend with high insertion rate, consistent and high quality appearance, nutritionally demanding with excellent disease tolerance. Use for ornamental gardens, prestigious recreational areas. excellent disease tolerance. Use for ornamental gardens, prestigious recreational areas.

Composition: 60% Linum perenne, 20% Festuca rubra.  
Dark colour – narrow leaf texture.

#	☞ x m <sup>2</sup>	📦
MISCBOTTROYGOLF	30/35 gr	1 kg

### Royal sea

Blend with excellent tolerance to summer dryness and disease, low maintenance. Use for sowing in coastal and recreational areas. Composition: 80% Festuca arundinacea, 10% Lolium perenne, 10% Bermudagrass. Medium-dark colour – broad leaf texture.

#	☞ x m <sup>2</sup>	📦
MISCBOTTROYSEA	45/50 gr	1 kg

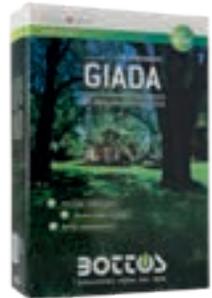

### Giada

Blend ideal for solving so-called active shading problems by living elements (and not just architectural structures). Use for private gardens with surfaces predominantly shaded by deciduous trees, or found in cold areas facing North.

Composition: 45% Lolium perenne, 30% Festuca rubra, 25% Festuca rubra commutata.

Bright green colour – fine leaf texture.

#	☞ x m <sup>2</sup>	📦
MISCBOTTGIADA	30/35 gr	1-5-20 kg

### Forteprato

Blend with good tolerance to dryness and disease, requires minimal fertilisation, high settlement rate. For ornamental low maintenance use and for public and technical greening. Composition: 50% Festuca arundinacea, 30% Lolium perenne.

Light colour – broad leaf texture.

#	☞ x m <sup>2</sup>	📦
MISCBOTTFORTEP	40/45 gr	20 kg

### Maciste

Blend with maximum tolerance to thermal extremes. Exceptional tolerance to dryness and disease. High settlement rate, excellent appearance. For ornamental use, sports and technical performance. Composition: 80% Festuca arundinacea, 10% Lolium perenne, 10% Poa pratensis. Medium-dark colour – medium leaf texture.

#	☞ x m <sup>2</sup>	📦
MISCBOTTMAC	45/50 gr	1-5-20 kg

### Dichondra repens

Short green ground cover. No mowing needed.

#			KG
SEPRADIR05B			0,5

### Bermuda grass

#			KG
SGRACOMU			0,5

### Trifolium nanum

Short clover.

#			KG
SEPRATFN05			0,5

## Bottos professional fertilisers

### Slow green

NPK 18-6-12 compound mineral fertiliser containing a slow release nitrogenous fraction equal to about 35% of the total nitrogen. The balance of immediate release and slow release nutrients determines regular activity in the soil to the advantage of vegetation for at least 60/90 days.

#	👁	NPK+ %	KG
SLOWGR4	Granules	18-6-12+2MgO	4 kg

### Slow k

Anti-stress fertilizer designed to help turf overcome critical periods such as summer and winter.

#		NPK+ %	KG
SLOWK1305204N		13-05-20+2MgO	4 kg

## 2. Substrates, organic mulching, fertilisers, biostimulants, turfs

### Pro start

NPK 13.24.10 compound mineral fertiliser is a specific fertiliser for sowing and/or oversowing operations, designed to allow the regular and uniform germination of all seeds. It contains slow release nitrogenous forms (25% Nutralene) to release the nutrient even after the emergence of the seedling for perfect tillering.

#		NPK+ %	
PROSTART4	Granules	13-24+10	4 kg

### Soil life

Soil Life contains nutritional components for plant growth in readily available, slow-release and controlled-release forms.

#	NPK+ %	
SOILLA1600154N	16-00-15+2MgO	4 kg

### Dark green

Dark Green can be used whenever it is necessary to enhance turf colour.

## Special fertilisers.

The market constantly offers an increasing number of products, not crop protection products, which can stimulate different physiological activities of plants, such as: photosynthesis, transpiration, rooting, flowering, setting, ripening, growth, but above all, suited to directly and indirectly defending our plants from the main stresses.

As they have evolved, plants have developed various defence mechanisms to protect themselves from fungi, viruses, bacteria and insects. There are many natural chemical substances which can activate the plant's defence mechanisms required to protect it against different types of attacks.

Hence the term "plant protection products".

In the case of defence mechanisms against fungi and bacteria, there are various compounds which, if administered externally on plants, directly combat the disease or activate their natural defence mechanisms.

The resistance mechanism is activated as soon as the disease succeeds in penetrating the first intercellular spaces and is chemically identified. The biochemical signal produced is sent to the entire plant including the roots, helping the plant to resist future attacks as well.

In the case of defence mechanisms against insects, mites and nematodes, there are a large number of natural solutions in nature that allow plants to defend themselves or directly combat their antagonists.

The products to defend plants from phytophagous insects can be summarised into four different groups:

- **Fungal antagonists:**  
which feed on and combat the development of harmful insects and fungi.
- **Repellents:**  
substances that repel the parasitic insect because they are irritating or they release unpleasant odours..
- **Feeding inhibitors:**  
substances which, once ingested, cause the insect to stop feeding.
- **Antagonistic insects and mites:**  
which feed on harmful insects and mites.

## Plant protection products to limit the damage caused by fungi and bacteria

### Zeolite 95 serbios

Sedimentary mineral with volcanic origin, mainly made of Silicon Oxide and Aluminum Oxide. Revitalizing, plant defense enhancer. Efficient for drastically reducing the humidity of plants, creating an adverse environment for the proliferation of fungal diseases.

#				
BICASO25	Foliar fungal diseases; Downy mildew; Powdery mildew	Micronised powder	Foliar	25 kg

### Biobacter®

Foliar fertilizer solution with hygienizing effect, made with water-soluble zinc. It also has an effect against the proliferation of bacteria and fungi.

#				
BIOBAL10	Bacteria; Fungi	Liquid	Foliar	10-20 lt

### Bioclean

Fortifying product based on Lactobacillus ferments.

#				
BIOCL	Resistance inducer; Bacteriostatic	Liquid	Foliar and fertigation	1 lt

### Bio-D

Mixture of manganese and zinc to rapidly correct deficiencies. Ideal for preventing leaf fungal diseases.

#				
BIOD	Powdery mildew; Rust; Alternaria; Leaf curl; Monilia	Liquid	Foliar and root	1,3-6,5-13 Kg

**Chitosano Serbios**

Made with completely natural and water-soluble chitosan hydrochloride. It stimulates a strong self-defence reaction of the plant against pathogenic fungi and bacteria, enhances the germinating power of seeds and increases the plant's resistance to negative abiotic factors (heat, water stress, etc.). It keeps the plant healthier and more resistant, positively influencing the quality and quantity of production.

#				
CHITOSL1	Bacteria; Fungi	Liquid	Foliar	1-5 lt

**Defence GR**

Resistance promoter and biostimulant, it feeds by defending the crops. Developed to protect plants from biotic and abiotic stresses. It makes a precautionary action against bacterial and fungal infections.

#				
DFENSE1	Bacteria; Fungi	Granules	Foliar and fertigation	1 kg

**Dentamet®**

Mixture of Manganese and Zinc chelated with citric acid (in the form of hydracid) to quickly correct deficiencies. Ideal for preventing leaf fungal diseases.

#				
DENTM	Downy mildew; Botrytis; Septoria; Coryneum blight; Monilia; Bacterial diseases	Liquid	Foliar and root	1,28 Kg; 6,40 Kg

**Equisetum Arvense™**

Product based on flavonoids, saponins and silicic acids. Prevents the onset and proliferation of fungal diseases with preventive and post-emergence treatments.

#				
EQUISAL	Downy mildew; Powdery mildew; Leaf curl	Liquid	Foliar	1-5 lt

**Evidence 2.0**

Product that contains protein extracts from microorganisms, which activate the endogenous immune system of plants and thus, induces and boosts their natural resistance to the development of fungal diseases.

#				
EVID5	Powdery mildew	Powder	Foliar	5 kg

**Maxi-Grow Excel**

An organic product obtained via fermentation processes to rebalance the photosynthesis and respiration of the plant in a controlled and safe manner by administering biomolecules that the plant is unable to synthesise due to adverse climate conditions.

#				
MAXGEXL	Resistance inducer	Liquid	Foliar	1 lt

**Mimetic**

Mixture of zinc and manganese micro-elements chelated through the use of lignosulfonates. Encourages photosynthesis and helps to overcome periods of thermal shock.

#				
NATURDAIM	Downy mildew	Liquid	Foliar and fertigation	1 lt

**Phytonik Plus**

NPK 02-24-16 fertiliser.

Liquid formulation containing Phosphorus and Potassium with high foliar and root absorption.

#				
PHYTONIKP	Downy mildew	Liquid	Root	1-6-25 Kg

**Plast Off L®**

Corrective product based on chestnut tannin extract. Stimulates defence reactions and activates the development of natural substances against different biotic and abiotic stresses.

#				
PLOFL	Downy mildew; bacteria	Liquid	Foliar	1-6 Kg

**Propoli Serbios**

Propolis extract in glycolic solution. Acts as an excellent enhancer of plant defence capabilities against fungal and bacterial attacks; it facilitates the rapid healing of wounds caused by trauma or pruning, whilst protecting the plant against the penetration of pathogens. It boosts pollination.

#				
PROPSL	Bacteria; Different cryptogams	Liquid	Foliar	1-5 lt

**Relife**

Specific product for increasing plant productivity. Boosts the formation of secondary roots and improves absorption.

#				
RELIF	Resistance inducer	Liquid	Foliar	1-5-20 kg

**Secur Zolfo**

Elemental sulphur suspension.

#				
SECURZ	Powdery mildew	Liquid	Foliar	1 - 5 - 10 - 25kg

**Streflu**

Allows the development in the rhizosphere of microorganisms which are beneficial to plants (PGPR), such as actinomycetes and *Streptomyces griseus*, as well as producing metabolites with antibacterial activity. The product also allows the development of bacteria, such as *Pseudomonas fluorescens* which combat different fungi that are harmful to the plant.

#				
STRFL	Fusarium Pythium	Powder	Foliar, root and fertigation	1-5 lt

### Sublim

The product preserves bacilli spores that are very useful to plants, which belong to the *Bacillus subtilis* and *Bacillus amyloliquefaciens* species. Some wild strains of these species are able to produce non-antibiotic substances, producing bio-protection and antibacterial effects. Prevents the colonisation of unwanted hosts. *Bacillus subtilis* is also an endophyte.

#				
SUBL	Burkholderia Ralstonia; Erwinia; Xanthomonas Botrytis	Liquid	Foliar	1-5 Lt

### Tannino 20

Corrective product based on chestnut tannin extract. Stimulates defence reactions and activates the development of natural substances against different biotic and abiotic stresses.

#				
TANN	Downy mildew; Bacteria	Liquid	Foliar	1-5-20 kg

### Tricoderma

The product stimulates biological activity in the soil and the development of the root system. In particular, at a subacid pH, the development of fungi, which are very beneficial for plants, such as those belonging to the genus *Trichoderma Viride*, *Harzianum* and *Clonostachys Rosea* (endophyte), which have the ability to combat phytopathogenic fungi.

#				
TRICD	Fusarium; Pythium; Armillaria; Phytophora; Sclerotinia; Rhizoctonia Solani	Liquid	Foliar	1-5 lt

### Xilotrom

Natural curative fungicide containing substances produced by microorganisms and phytoextracts with a very powerful action on fungi. The enzymes break down the cell wall of the fungi, allowing the alkaloids to destroy the metabolism of the fungi. It also promotes root functions.

#				
XILO	Downy mildew; Canker; Fusarium wilt; Phytophora; Pythium; Verticillium Rhizoctonia; Alternaria	Liquid	Foliar	0,25-1 Lt

**Zeolite 95 Serbios**

Sedimentary mineral with volcanic origin, mainly made of Silicon Oxide and Aluminum Oxide. Revitalizing, plant defense enhancer. Efficient for drastically reducing the humidity of plants, creating an adverse environment for the proliferation of fungal diseases.

#				
ZEO9510	Botrytis	Micronised powder	Foliar	1-10 kg

## Plant protection products to limit the damage caused by insects and mites

**Bio Ortica**

Nettle macerate rich in salicylic acid and formic acid, effective as a repellent against mites and insects.

#				
BIORT	Mites; Insects	Liquid	Foliar	1-5-20 lt

**Bio Storm**

Invigorator based on phytoextracts, soybean oil, lecithins that help the plant to create an inhospitable habitat for many species of harmful insects.

#				
BIOSTOL10	Scale insects; Aphids; Whiteflies	Liquid	Foliar	0,25-1 lt

**Biogeo M**

Boosts the development of fungi, such as *Metarhizium anisopliae* which germinate and develop to the detriment of weevils, click beetles, corn rootworms, owl moths, as well as dark-winged fungus gnats.

#				
BGEOM10	Weevils; Larvae; Ground beetles	Microgranules	Substrate	10 kg

**Bionet**

Mineral fertiliser solution of BTC potassium salts ideal for cleaning vegetation and fruit of all forms of natural or parasitic soiling, such as honeydew, sooty mould, etc.

#				
BIONE	Scale insects	Liquid	Foliar	1 kg 5 kg 25 kg

**Bmx**

Product containing Beauveria bassiana and Metarhizium anisoplie to combat the presence of larvae in the substrates.

#				
BMXG10	Weevils; Larvae; Ground beetles	Powder	Substrate	1 kg

**Bmx-L**

Product containing Beauveria bassiana and Metarhizium anisoplie to combat the presence of larvae in the substrates.

#				
BMXL	Weevils; Larvae; Ground beetles	Liquid	Root	10 Kg

**Caolino Gold Surround**

Revitalizing, plant defense enhancer. It creates a thin layer of mineral particles that protect crops from heating and sunburn. It performs a physical-mechanical protection from some insects and positively influences quality and quantity of productions.

#				
CAOGOS125	Insects	Powder	Foliar	12,5 kg

**Cober® Plus**

Mixture of phytoextracts with an anti-feeding effect for the indirect control of parasites on herbaceous, tree and horticultural crops.

#				
COBEPL	Aphids; White flies; Mites; Flea beetles; Scale insects; Larvae	Liquid	Foliar	1-5 lt

**Soptech**

Mixture of long chain fatty acids for indirect control of soft-body parasites, rapidly dehydrating them. It also helps to cleanse secretions of honeydew and sooty mould caused by aphids, scale insects, white flies and psylla.

#				
SPTECHL1	Aphids; Scale insects; White flies; Psylla	Liquid	Foliar	1 lt

**Delumbri Limax**

Water-based formula consisting of a mixture of fermented phytoextracts for the indirect control of larvae and soil-dwelling insects infesting land and lawns. Indirect mechanism for repellent and anti-feeding action.

#				
DELUML	Snails; Slugs; Insects Insects; Worms; Mole cricket	Liquid	Foliar, root and fertigation	1-5-10 lt

**Furos® Twin-F1**

Mixture inoculated with soil fungi and bacteria, which promotes the development of the root system. When combined with NEM2, it has a high rhizogenic activity and allows the crop to combat the damage caused by soil parasites and nematodes.

#				
FURTW1	Nematodes	Liquid	Root and fertigation	1-5 Kg

**Furos® Twin-Nem2**

Mixture inoculated with soil fungi and bacteria, which promotes the development of the root system. When combined with NEM2, it has a high rhizogenic activity and allows the crop to combat the damage caused by soil parasites and nematodes.

#				
FURTN2	Nematodes	Liquid	Root and fertigation	1-5 kg

**Gussan**

Organic insecticide containing *Bacillus thuringiensis* toxins and other bacterial strains. Combats larvae through ingestion.

#				
GUSS	Leaf miners Absoluta; Diamondback moth; Spodoptera; Heliothis	Liquid	Foliar	1 lt

**K&A Demon**

Sulphur formulated in aqueous suspension for the treatment of specific deficiencies; particularly suitable for foliar interventions in all crops.

#				
K&ADML	Owlet moths; Scale insects	Liquid	Foliar	1-5 Lt

## BIO INSECTICIDES

### LECTINA 80

Fortifying enhancer of the natural defences of plants. The product has a direct physical action against fungi and insects. It also reduces abiotic stresses and acts a synergist for herbicides, fungicides and insecticides.

#				
LECTNA	Scale insects; Aphids; White flies; Mites	Liquid	Foliar	1-5 lt

### Nutramite Top®

Natural product containing a concentrated solution of seaweed. It stimulates the vegetative development of all crops by energising and stimulating the plant's immunity system.

#				
NUTRT	Mites	Liquid	Foliar	0,25 Kg 1 kg 5 kg

### Neem Oil

Plant-based oil obtained by cold pressing of the seeds of Azadirachta Indica (neem tree).

#				
OLNEE	Aphids; Psylla; Scale insects; Thrips	Liquid	Foliar	1-5 Lt

### Soybean Oil Max 85

Fortifying enhancer of the natural defences of plants. The product has a direct physical action against fungi and insects. It also reduces abiotic stresses and acts a synergist for herbicides, fungicides and insecticides.

#				
OLISOML	Scale insects; Aphids; White flies; Mites	Liquid	Foliar	1-5-25 kg

### Sbs 200 K Plus

Potassium soap, composed of natural, completely biodegradable, non-polluting ingredients which are harmless to humans and animals. It combines an effective and rapid supply of potassium with the break-down of organic residue (honeydew, sooty mould), secreted by numerous phytophagous insects.

#				
SBSL	Scale insects	Liquid	Foliar	1,3-12 kg

**Sinapis Plus**

4% mustard oil. Fortifying enhancer of the natural defences. It increases the autogenous defences of plants and induces resistance against insects and mites.

#	☼	👁	📍	📦
SINAPP1	Aphids; Whiteflies	Liquid	Root	1-5-25 kg

**Tannino 4**

Revitalizing containing chestnut tannin able to inducing resistance to insects.

#	☼	👁	📍	📦
TANN4	Insects	Liquid	Foliar	15-20 Lt

## Useful insects and mites

---

They are instruments of biological control, the crop defence technique based on the control of harmful organisms with their natural antagonists. The latter are bred to be distributed on crops as part of biological and integrated control programs.

## Adalia

**Adalia Bipunctata**

#	⊕	🐞x📦
ADAL	aphid predator	80

HYP0	soil pest predator	25000

**Trichopria****Trichopria drosophilae**

#	⊕	🐞 × 📦
TRICH	spotted wing Drosophila parasitoid	500/5.000

# Nematodes

Entomopathogenic nematodes are small worm-like organisms that live in the soil at the expense of insect larvae. The most important species belong to the genera *Steinernema* and *Heterorhabditis* which penetrate their victims through the openings of the body or even actively through the exoskeleton. Once inside the host, the nematode releases symbiotic microorganisms which multiplying cause the death of the insect in 24-72 hours. The dead insects turn yellow-brown or reddish depending on the species. The activity of the microorganisms transforms the interior of the insect into an ideal substrate for the reproduction of the nematode which carries out one or two reproductive cycles, until it produces thousands more infectious larvae that abandon the now rotten corpse of the insect, in search of new hosts.

Besides being very effective in the control of several important species of insects harmful to crops, nematodes are completely harmless for non-target species and for higher animals, thus constituting an important group of biological control agents, which are very useful, versatile and with increasing application.

Their application is simple and carried out after dispersion in water, which is then distributed on the ground with conventional equipment near the plants.

## Nemopak SC

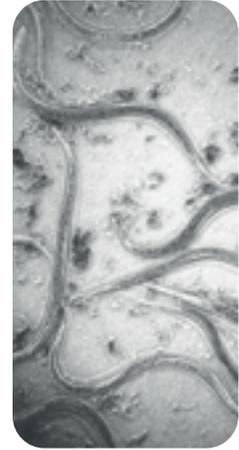

*Steinernema carpocapsae* is a common entomopathogenic nematode which can live on various insect species. In particular, it is most commonly used against the overwintering larvae of the *Cydia pomonella* (apple and pear carpocapsa) to be carried out with applications to the trunk in September, against the mole cricket that can infest lawns, against the crane fly or flatheaded woodborer (*Capnodis tenebrionis*) which affect the roots of fruit trees.

#

NEMOPSC

50-500 Million

## Nemopak HB

*Heterorhabditis bacteriophora* is an entomopathogenic nematode used for the biological control of the larvae of weevils, and other beetles and soil-dwelling insects, which they actively penetrate and kill within 24-72 hours. These nematodes move actively in the soil in the search of host larvae. The entomopathogenic behaviour is due to the symbiosis with a bacterium of the genus *Xenorhabdus* which is transported inside the host and whose action makes the substrate favourable for the development of the nematode. At the end of the infection, thousands of new infectious nematode larvae leave the corpse in search of new hosts. The use of entomopathogenic nematodes leads to a rapid and long-lasting action. Application is extremely easy and absolutely safe for humans and the environment.

#

NEMOPHB

50-500 Million

## Nemopak SF

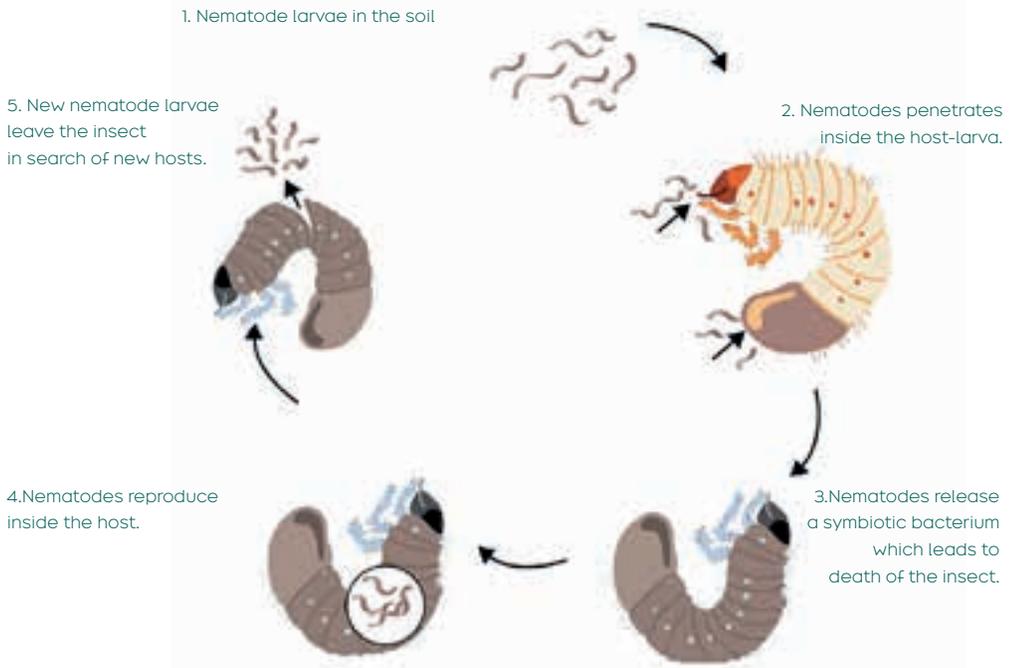

*Steinernema feltiae* is an entomopathogenic nematode used for the biological control of Diptera larvae (dark-winged fungus gnats, phorid flies, leaf-miner flies, stable flies) and Lepidoptera (owlet moths, stem borers, cossid millers, clearwing moths). This nematode lies in wait in the soil for its victims which are actively penetrated. Once inside the host, a symbiotic microorganism (genus *Xenorhabdus*) is released which leads to the death of the larva within 24-72 hours. The activity of the bacterium creates an ideal substrate for the development of thousands of new nematodes which then leave the corpse in search of new hosts. NemopakSF has a fast, effective and long-lasting action, perpetuating the cycle. It is applied with conventional equipment and is completely safe for humans and plants. NemopakSF contains 50 million infectious *Steinernema feltiae* larvae in an inert material. It is most commonly used in horticulture for the control of dark-winged fungus gnat larvae in pot plants, substrate or pallets. *Steinernema feltiae* is very active at temperatures of 15-20°C, while it loses its effectiveness below 10°C and above 30°C.

#

NEMOPSF

50-500 Million

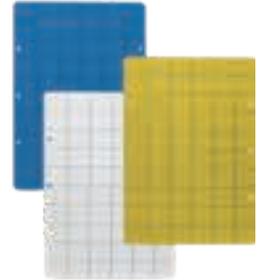

# Traps for monitoring and control

## Temo-o-cid chromotropic traps

### Adhesive trap for flying insects

Panel 40x25cm; Chromotropic traps are coloured panels coated with glue that do not contain toxic substances, do not pollute and capture target insects depending on the colour. They can be used in greenhouses, open fields and vegetable gardens as they are resistant to humidity and bad weather and do not dry out over time. Chromotropic traps are a valid alternative to plant protection products and are a 100% natural and organic way to tackle insects.

Colours: ●●●

#		
TRAPCMTOCG	●	Flies
TRAPCMTOCB	●	Thrips
TRAPCMTOCN	●	Leaf miners (Tuta Absoluta)

## Tap trap®

### Organic insect trap

Eco-friendly organic insect trap. The yellow cap is highly attractive to numerous insects and is normally attached to plastic bottles, allowing the insects to enter, but not to escape. It can be used with D.I.Y. baits or specific pheromones.

#	
TAPTRAP	5 pcs

## Dakofaka

### Ready-to-use insect trap for controlling olive fruit flies (*bactrocera oleae*)

Trap that works with "Attract & Kill" technology: it consists of a polyethylene bag externally coated with a special paper, impregnated with an insecticide that works by contact. Once the trap is activated (by making two holes in the points marked with the X), the adult flies are attracted to the surface and, after touching it, they die quickly.

#

DAKOF

Deltamethrin (0,2%)

## Kit BDT

BDT is a semi-transparent trap in preformed propylene laminate which is easy to use and long-lasting. Thanks to its structure, it allows a quick inspection of the glued base, which can be easily removable from the central body, without coming into contact with the glue. The tab, which is used to house the dispenser, also allows it to remain suspended and not glued to the bottom: this guarantees a uniform and complete diffusion of the pheromone contained in the dispenser. Specifically for moths and butterflies, but can be used with various pheromones.

#

KITTPBDT

3 bdt + 9 bases + 3 hooks

## Super track drip hose

### "four winds" trap for monitoring

It should be positioned at approximately 1.5 m above ground level, facing and aligned with the prevailing wind direction, maintaining a distance of 25–30 metres between traps and from the edges of the crop. The dispensers must be placed inside the traps and remain effective for 5–6 weeks. The list of available dispensers is shown on the following page.

#

STRALA

# Sexual confusion

## Isomate® OFM Red Flex

Dispenser of pheromones to control of *Grapholita molesta* (Oriental fruit moth) and *Grapholita funebrana* (red plum maggot). Controlled-release dispenser containing the Oriental fruit moth pheromone. The product consists of two parallel tubes of polymeric material sealed at the ends and open in the centre to allow application on the plant. The sexual confusion works through the even distribution of the pheromone in the crop environment to be protected.

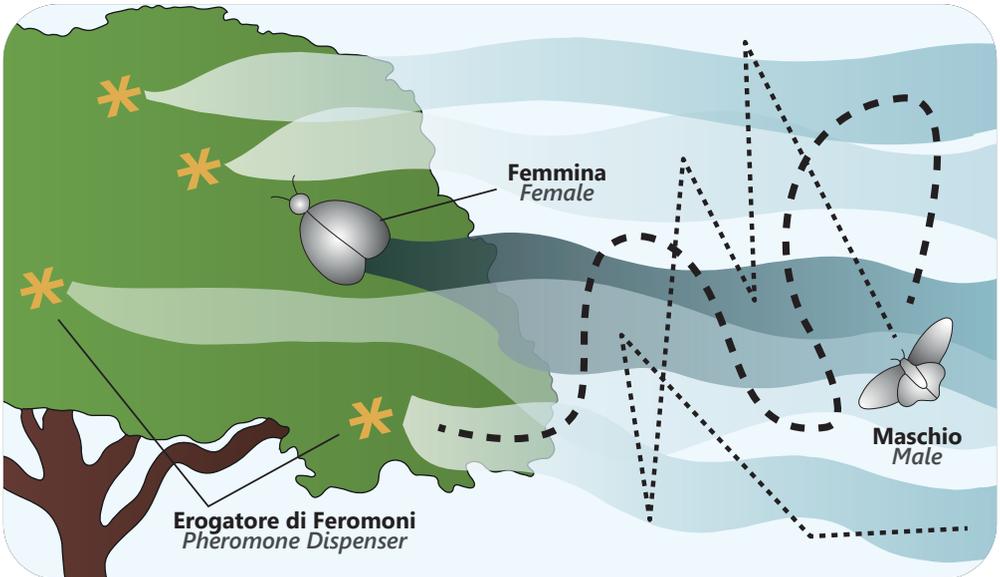

#			
ISOMAR200	(E)-8-Dodecen-1-yl acetate (896 g/kg) + (Z)-8-Dodecen-1-yl acetate (54 g/kg) + (Z)-8-Dodecen-1-ol (10 g/kg)	600 pcs/ha	200 pcs

## Isonet® Z

Pheromone dispenser to control *Zeuzera pyrina* (Leopard moth) and *Synanthedon tipuliformis* (Currant clearwing). Isonet® Z is a controlled-release dispenser containing the pheromone of the leopard moth. The product consists of two parallel polymer plastic microcapillary tubes, one of which contains the aluminium wire for the application and the other is filled with the specific pheromone. Loosely twist the dispensers onto the woody parts of the plant avoiding direct exposure to the sun.

#			
ISONEZ100	(E,Z)-2,13-Octadecadienyl acetate, (E,Z)- 3,13-Octadecadienyl acetate (guardoorseed minimum per dispenser: 66 mg)	300 pcs/ha	100 pcs

# Pheromone dispensers

---

Pheromones are volatile substances that insects secrete in order to send messages to individuals of the same species, which react to these signals with movements, designed to respond to sexual, aggregation or other types of call. Pheromones, produced by chemical synthesis, but identical to natural ones, are used mainly for monitoring purposes, i.e. to ascertain the presence of individual harmful species, detect the period of the attack and assess the extent of possible damage. Monitoring makes it possible to choose the periods of pesticide intervention, use targeted control means and minimise the number of treatments. Since pheromones are specific for each phytophagous, they selectively attract insects of the same species.

In addition to the pheromone, the way in which this active ingredient is released into the environment is extremely important. Consequently, dispensers of different shapes and materials have been designed to support the active substance by dispensing the pheromone in a similar way to its release by the insect.

## Available pheromones

Adoxophyes orana (Summer fruit tortrix)

---

Agriotes (brevis, litigiosus, sordidus, ustulatus)

---

Agrotis exclamationis (Heart and dart moth)

---

Agrotis ipsilon (Dark sword moth)

---

Anarsia lineatella (Peach twig borer)

---

Anomala vitis (Vine chafer)

---

Aonidiella aurantii (Red scale)

---

Archips podanus (Great brown twist moth)

---

Archips rosanus (Rose tortrix)

---

Argyrotaenia pulchellana (Eulia)

---

Cameraria ohridella (Horse-chestnut leaf miner)

---

Ceratitis capitata (Mediterranean fruit fly)

---

Cetonia aurata (Rose chafer)

---

Comstockaspis perniciosa (San Jose scale)

---

Cossus cossus (Goat moth)

---

Cydia funebrana (Plum fruit moth)

---

Cydia molesta (Peach moth)

---

Cydia nigricana (Pea moth)

---

Cydia pomonella (Codling moth)

---

Dacus oleae (Olive fruit fly)

---

Diabrotica virgifera (Western corn rootworm)

---

Drosophila suzukii (Spotted wing drosophila)

---

Ephestia elutella (Cacao moth)

---

Ephestia kuehniella (Mediterranean flour moth)

---

Eupoecilia ambiguella (Vine moth)

---

Euzophera bigella (Quince moth)

---

Halyomorpha halys (Stink bug)

---

Heliothis armigera (Cotton bollworm)

---

Ips typographus (Spruce bark beetle)

---

Leucoptera malifoliella (Pear leaf blister moth)

Lobesia botrana (Grapevine moth)

---

Lymantria dispar (Gypsy moth)

---

Lymantria monacha (Nun moth)

---

Mamestra brassicae (Cabbage moth)

---

Mamestra oleracea (Bright-line brown-eye moth)

---

Orgyia antiqua (Rusty tussock moth)

---

Ostrinia nubilalis (Corner borer)

---

Pandemis cerasana (Barred fruit-tree tortrix)

---

Pandemis heparana (Apple brown tortrix)

---

Paranthrene tabaniformis (Poplar clearwing)

---

Phyllonorycter spp (Leaf miner)

---

Phtorimaea operculella (Potato tuber moth)

---

Pityogenes chalcographus (Spruce wood bark beetle)

---

Planococcus citri (Citrus mealybug)

---

Plodia interpunctella (Indian meal moth)

---

Popillia japonica (Japanese beetle)

---

Prays citri (Citrus flower moth)

---

Prays oleae (Olive moth)

---

Pseudaulacaspis pentagona (White peach scale)

---

Rhyacionia buoliana (Pine shoot moth)

---

Rhynchophorus ferrugineus (Red palm weevil)

---

Sitotroga cerealella (Grain moth)

---

Spodoptera exigua (Beet armyworm)

---

Spodoptera littoralis (Cotton leafworm)

---

Synanthedon myopaeformis (Apple clearwing))

---

Synanthedon tipuliformis (Currant clearwing)

---

Tuta absoluta (Tomato leaf miner)

---

Thaumetopoea pityocampa (Pine processionary)

# Endotherapy

Endotherapy is a defence system of urban green spaces which allows annoying and/or harmful insects to be eliminated without using chemical products in the environment, by injecting the products directly into the trunk of the tree to be treated.

## Arbocap

Material: polypropylene

Capacity: 50 ml

Operating pressure with steel spring: 0.2–0.7 bar

# Plant protection products

---

Directive 2009/128/EC, implemented with Italian legislative decree no. 150 of 14 August 2012, establishing a "framework for Community action to achieve the sustainable use of pesticides". To implement this directive, National Action Plans (NAPs) have been defined to establish the objectives, measures, times and indicators for reducing the risks and impacts deriving from the use of plant protection products. The Action Plan, adopted in Italy with the Interministerial Decree of 22 January 2014, promotes practices for the use of more sustainable plant protection products and provides indications for reducing the impact of plant protection products in agricultural areas, in non-agricultural areas (urban green areas, roads, railways, etc.) and in protected natural areas.

- Pressurised gases (Tablets, liquefied, dissolved) that might explode if exposed to heat.
- Even gases that are normally safe may become dangerous when pressurised.

- Explosives.
- Self-reactive substances and mixtures.
- Organic peroxides that might cause explosions if exposed to heat.

- Flammable gases, aerosols, liquids and solids.
  - Self-heating substances and mixtures.
  - Pyrophoric liquids and solids that may ignite in contact with air.
  - Substances or mixtures that emit flammable gases in contact with water.
  - Self-reactive substances and mixtures or organic peroxides that might cause a fire if exposed to heat.
-

- It is carcinogenic
- It is harmful to fertility and the foetus
- It causes mutilations
- It affects the respiratory tract and may cause allergies, asthma or breathing difficulties if inhaled.
- It is toxic for certain organs
- It entails aspiration risks: it may be damaging or even lethal if swallowed or introduced into the respiratory tract.
- Oxidising gases, solids and liquids that may provoke or make a fire or explosion more dangerous.

---

Chemical substance which is acutely toxic in contact with the skin, if inhaled, or swallowed, and which may be lethal.

- Corrosive substance that may cause serious skin burns and eye damage.
- The symbol may also indicate a corrosive action on metals.

---

Substance hazardous to the environment and toxic for aquatic organisms.

---

Indicate one or more of the following properties:

- It is harmful.
- It causes skin sensitisation and irritation of the skin and eyes.
- It irritates the respiratory tract.
- It has narcotic effects, causes drowsiness or dizziness.
- It is dangerous for the ozone.

# Organic farming

Organic farming is a production method defined at European Community level through EC Regulation 834/2007 and at national level by Italian Ministerial Decree 220/95. It foresees the use of natural substances, thus excluding the use of synthetic chemicals. At the same time, organic farming includes cultivation techniques that avoid the excessive exploitation of natural resources, in particular soil, water and air. In order for a farm to be considered organic and, therefore, permitted to sell its products as organic, it must operate in compliance with the regulations governing organic production and the use of permitted technical means, including plant protection products and fertilisers.

Look for the BIO icon in the catalogue to identify our range dedicated to organic farming.

**Stocker Geyser**

The ideal solution for those who want to enjoy their garden in total relaxation and get rid of mosquitoes effortlessly. The nebuliser operates automatically and safely: the intuitive front-mounted display allows setting the frequency and duration of the cycles, while an acoustic timer signals activation 30 seconds in advance, allowing time to move away before treatment begins.

#	
GEYSER12	12 lt
GEYSER4	4 lt

**Zanzatrap 360°**

A UV lamp emits heat and light at a specific frequency. The combination of light and heat is highly attractive to common mosquitoes and other flying insects (the special blue lamp is less attractive to "beneficial" insects, helping to preserve bees and butterflies). UV rays irradiate the internal surface of the device, coated with titanium dioxide, triggering photocatalysis that produces CO<sub>2</sub>, a strong attractant for mosquitoes. The fan disperses the CO<sub>2</sub> into the surrounding area, drawing in mosquitoes which, once close, are sucked in and trapped in the lower container, where they die from dehydration.

# Consultancy service for waste disposal

---

Agri Vivai offers a consultancy service for the disposal of agricultural waste, such as empty containers of reclaimed pesticides, hazardous substance residue, greenhouse polyethylene, mulch sheets, pots and boxes of plastic material, etc.

The service provides information on the correct method for waste storage, as well as the organisation of periodic collections and, on request, of different types of material, in compliance with current legislation.

## Poison centres

---

### What to do in case of poisoning:

- Do not induce vomiting;
- Do not administer milk or other;
- Promptly call the nearest poison centre for instructions on what to do.

### What to tell the poison centre operator:

- Age of the affected person (even roughly);
- Approximate weight;
- What they swallowed (or at least what you think);
- How much they swallowed;
- How long ago;
- How they are now.

### Patilux

Ultra-transparent film with excellent thermal effect and high flexibility and strength. Ideal for crops which require intense natural light as a key factor, even in critical seasons with less sunlight.

### Pati Di Lite

Innovative diffused light thermal film. Over 40% of the light which passes through the film is diffused. Ideal for geographical areas with long periods of sunshine where care must be taken over direct sunlight without lowering the total amount of available light.

## Biodegradable mulch sheet

Mulch sheet made from corn and potato starch, 100% biodegradable. Does not need to be removed at the end of crop cycle. Effective in controlling weeds without using chemical products. Increases crop yield (early harvest and accelerates plant growth). Zero plastic waste for disposal.

Does not cause soil pollution.

# Footwear

## CE TECHNICAL FOOTWEAR REQUIREMENTS

All PPE of any category must comply with the European regulation in force for the ESSENTIAL REQUIREMENTS framework laid down by the directives and specified by the standards. The CE marking is a passport for the product which thus ensures free circulation in the EUROPEAN UNION.

Any PPE placed on the market has been the subject of a technical report and is accompanied by a declaration of conformity and a package leaflet.

The use of PPE must not be a substitute for collective protection measures or work organisation, but must be regarded as protection from possible residual risks, i.e. those risks which, despite the improvements implemented, are impossible or are difficult to eliminate.

### Reference category

Make sure that the footwear corresponds to the required risk category, depending on the type and place of work. We, therefore, specify the European standards and the specifications to which they refer:

- **A** Antistatic footwear
- **E** Energy absorption in the heel area
- **FO** Sole resistant to hydrocarbons
- **P** Anti-perforation plate (1100 N.)
- **HRO** Heat Resistant Outsole
- **CI** Cold insulation of the bottom of the shoe
- **HI** Heat insulation of the bottom of the shoe
- **WR** Water Resistant Footwear
- **WRU** Water Resistant Upper
- **M** Footwear with metatarsal protection
- **CR** Cut-resistant upper
- **SRC** Slip-resistant footwear

### EN ISO 20345:2011 (S Category)

- **SB**
- **S1** A+FO+E
- **S1P** A+FO+E+P
- **S2** A+FO+E+WRU
- **S3** A+FO+E+WRU+P
- **S4** A+FO+E+ water tightness
- **S5** A+FO+E+P+ water tightness

### EN ISO 20347:2012 (Ø category)

- **OB**
- **O1** A+E
- **O1P** A+E+P
- **O2** A+E+WRU
- **O3** A+E+WRU+P
- **O4** A+E+ water tightness
- **O5** A+E+P+ water tightness

# Crispi footwear

## Crispi Futura CX GTX

Lightness and walking agility combine with stability and control, thanks to the fusion of an anatomical and precise upper wrap, with a 4X4 sole.

#	
SCARCRISPIFUT	36 - 48

## Crispi Futura PWR

#	
SCARCRISPIFUTPWR	36 - 48

## Crispi Valdres GTX

Ideal for long periods of use thanks to the anatomical shape and, above all, its lightness. The thermoforming gives greater structure, protection and support to the foot. Precise wrapping, stability and comfort thanks to the CCF insert in the midsole.

#	
SCARCRISPIVALDRES	36 - 48

## Crispi Nevada Legend EFX

Stability, comfort and impact protection thanks to the Elastoflex midsole and tread with Megagrip compound.

#	
SCARCRISPINEVADA	36 - 50

## Crispi Monaco GTX

The shoe that fits your foot from the very first moment.  
Maximum comfort, great stability and outstanding support.

#	
SCARCRISPIMONACO	35 - 48

## Crispi Attiva Low

Attiva, as its name suggests, is a shoe always ready for use, easy to put on.

# PPE

## PPE is divided into three categories according to risk

- **SIMPLE PPE**

Intended to protect users from minimal risks.

Declaration of Conformity issued by the manufacturer under its own responsibility.

The PPE marking is shown by affixing of the  mark only.

- **INTERMEDIATE PPE**

Intended to safeguard users from current risks.  certification issued by an authorised control body. The PPE undergoes checks by an authorised control body to establish compliance with the standards.

The PPE marking is shown by affixing of the  mark only.

- **COMPLEX PPE**

Intended to protect users from the risk of death or serious and permanent injury.

 certification issued by an authorised control body.

The PPE must be manufactured under the control of a  quality guarantee system or a  quality assurance system and subjected to risk category 2 checks. The PPE marking is shown by affixing of the  mark followed by the identification number of the authorised control body.

## Main European standards for protective gloves

- **EN420**

General requirements for protective gloves. It is the reference standard that lays down the general requirements for protective gloves, the principles of design and construction, safety, comfort and efficiency, sizes, dexterity, marking, information and instructions for use.

- **EN388**

abcd

Protective gloves against mechanical risks.

a - Resistance to abrasion

b - Resistance to cutting

c - Resistance to tearing

d - Resistance to perforation

PERFORMANCE LEVELS: a 0-4 • b 0-5 • c 0-4 • d 0-4

- **EN420**

Protective gloves against dangerous chemicals and micro-organisms.

● **EN374/1**

Waterproof gloves and low chemical protection.

● **EN374/2**

Determination of resistance to penetration.

Acceptable quality level (AQL) reference.

PERFORMANCE LEVELS: 1-3

● **EN374/3**

Determination of resistance to the permeation of chemical products.

Permeability measurement.

PERMEATION INDEX: 1-6

● **EN511**

Protective gloves against cold.

a - Resistance to convective cold

b - Resistance to contact cold

c - Water permeability

PERFORMANCE LEVELS: a 0-4 • b 0-5 • c 0-1

abc

● **EN407**

Protective gloves against heat and fire.

a - Fire properties

b - Resistance to contact heat

c - Resistance to convective heat

d - Resistance to radiant heat

e - Resistance to small splashes of molten metal

f - Resistance to large splashes of molten metal

PERFORMANCE LEVELS: a 0-4 • b 0-4 • c 0-4 • d 0-4 • e 0-4 • f 0-4

abcdef

● **EN1082/1**

They offer a specific protection against stabs.

They are used in slaughterhouses, meat and fish processing industries, catering.

They can also be used in the plastic, leather, textile and paper industries.

● **EN421**

Protective gloves against ionizing.

Protection against ionizing radiation and radioactive contamination.

LEVEL X: the test is not applicable or the glove has not been tested.

● **EN374/2**

Against the risks for users of chainsaws.
